PROFILE

A high-energy and passionate full-stack software developer with more than 4 years experience within IT and Software Development. Driven to produce high quality and efficient applications that have tangible, positive impacts on the community. Proven experience with all aspects of a software project life-cycle, from business analysis activities to development and delivery. Self-reliant but seeks to foster strong relationships with the team and clients. A Linux and FOSS advocate, who values collaboration, openness, and effectiveness.
